

**If you have any Questions
regarding Navis please contact
your Operations Manager**

- Johan van Niekerk – 083 2861894
- Moffat Ramatswane – 083 4548307
- Michael Vilakazi – 083 2585529

Why Navis?

To have single improved and integrated container operating systems for TFR and TPT that will:

- ✓ **Enhanced planning and management of containers across the value chain**
- ✓ **Increased customer system interaction and visibility**
- ✓ **Reduced risk of customer claims due to misplaced containers**
- ✓ **Enhanced Customer Satisfaction Resulting to More Business**
- ✓ **Improved Data accuracy and integrity**
- ✓ **Reduced unplanned movements and stacking**

Navis System is a container terminal operational system that will be replacing the current (Container Movement Management) CMM System.

Vehicle Mounted Terminals that will be installed in Reach stackers and MAFI's

Hand held terminals for use by Cargo Coordinator grades

NAVIS PROJECT

TRANSNET

**Vehicle Mounted
Terminals (VMT) will
be installed in
Reachstackers and
MAFI's through which
Senior Service Drivers
will receive
instructions and
confirm completion of
tasks**

NAVIS PROJECT

TRANSNET

With Navis we stack containers as instructed by the Controller

If you can not place a container in the correct position as instructed , Inform the Equipment Controller immediately

A **WRONGLY PLACED CONTAINER** affects where other containers can go creating A **BIGGER PROBLEM** and **SLOWING DOWN** the whole team, so that we don't meet targets.

This wrongly placed container is gonna slow us down!

WRONG CONTAINER

RIGHT CONTAINER

NAVIS PROJECT

TRANSNET

If you are unable to place a container in the position advised by the system, **DO NOT DUMP IT.**

HUH???

Operator 17 to Equipment control, my problem is... please advise.

NAVIS PROJECT

TRANSNET

External Truck drivers will receive a drop off ticket or pick up ticket with a stack position at the gate

I must go to the position in the Terminal as indicated on my pick up ticket I received at the gate

ABC Trucking Co

NAVIS PROJECT

TRANSNET

freight rail

**One MISSING CONTAINER
can affect a
WHOLE ASSEMBLY LINE
so we cannot short-ship.**

**This terminals
Negligence is
causing me to loose
money**

**Missing
container**

TRANSNET

freight rail

What do you mean
you've lost the
container!!!
THIS IS THE LAST TIME
I USE RAIL !!!

**UPSET A CUSTOMER
and we could
LOSE THE CUSTOMER!**

**ABC
Rail Customer**

If all the TFR employees update their activities we can all benefit from better service

Having visibility on the Transnet Navis system enabling me as a customer to Track my containers

ABC
Rail Customer

Looking for containers that have not been stacked according to instructions delays Trains which delays Vessels causing unhappy customers and penalties being paid

This wrongly placed container is going to delay the Anaconda and make us appear unscheduled
