## 5 BROAD-BASED BLACK ECONOMIC EMPOWERMENT AND SOCIO-ECONOMIC OBLIGATIONS

Transnet fully endorses and supports the Government's Broad-Based Black Economic Empowerment Programme and it is strongly of the opinion that all South African business enterprises have an equal obligation to redress the imbalances of the past.

Transnet would therefore prefer to do business with local business enterprises who share these same values and who are prepared to contribute to meaningful B-BBEE initiatives [including, but not limited to subcontracting and Joint Ventures] as part of their tendered responses. Transnet will accordingly allow "preference" points to companies who provide a B-BBEE Accreditation Certificate. All procurement transactions will be evaluated accordingly.

Consequently, when Transnet invites prospective Service Providers to submit Proposals for its various expenditure programmes, it urges Respondents [*Large Enterprises and QSE's - see below*] to have themselves accredited in compliance with the Government Gazette No 34612, Notice No. 754 dated 23 September 2011. As from 1 October 2011 valid B-BBEE Accreditation Certificates must be issued by

- a) Verification Agencies accredited by the South African National Accreditation System [**SANAS**];  
or
- b) Registered auditors approved by the Independent Regulatory Board of Auditors [**IRBA**], in accordance with the approval granted by the Department of Trade and Industry.

A Verification Certificate issued must reflect the weighted points attained by the measured entity for each element of the scorecard as well as the overall B-BBEE rating.

### 5.1 B-BBEE Rating

Enterprises will be rated by Verification Agencies or registered auditors based on the following:

- a) **Large Enterprises** [i.e. annual turnover greater than R35 million]:
  - Rating level based on all seven elements of the B-BBEE scorecard
- b) **Qualifying Small Enterprises – QSE** [i.e. annual turnover between R5 million and R35 million]:
  - Rating based on any four of the elements of the B-BBEE scorecard

- c) **Exempted Micro Enterprises – EME** [i.e. annual turnover less than R5 million]:
- EMEs are exempted from B-BBEE accreditation
  - Automatic rating of Level 4 B-BBEE irrespective of race or ownership
  - Black ownership greater than 50% or Black Women ownership greater than 50% automatically qualify as Level 3 B-BBEE
  - EME's should provide documentary proof of annual turnover [i.e. annual financials signed off by an accounting officer] plus proof of Black ownership if Black ownership is greater than 50% and/or Black Women ownership is greater than 50%

Respondents will be required to furnish proof of the above to Transnet. [i.e. a detailed scorecard as stipulated above in respect of Large Enterprises and QSEs, or proof of turnover in respect of EMEs].

*N.B. Failure to do so will result in a score of zero being allocated for B-BBEE.*

**Turnover: Kindly indicate your entity's annual turnover for the past year:**

R\_\_\_\_\_

**All Respondents must complete and return the B-BBEE Preference Points Claim Form attached hereto as Annexure A.**

## 5.2 Joint Ventures and Subcontractors

In addition to the above, Respondents who wish to enter into a Joint Venture with, or subcontract portions of the contract to, B-BBEE entities must state in their RFPs, the percentage of the total contract value that will be allocated to such B-BBEE entities, should they be successful in being awarded any business. A rating certificate in respect of such B-BBEE JV-partners and/or subcontractor(s), as well as a breakdown of the distribution of the aforementioned percentage must also be furnished with the RFP response to enable Transnet to evaluate in accordance with the processes outlined in the B-BBEE Preference Points Claim Form appended hereto as Annexure A.

Please note that a Respondent will not be awarded points for B-BBEE if it is indicated in its Proposal that such Respondent intends subcontracting more than 25% [twenty-five per cent] of the value of the contract to an entity that does not qualify for at least the same points that the Respondent qualifies for, unless the intended subcontractor is an EME with the capability to execute the contract.

## 5.3 B-BBEE Registration

In addition to the accreditation certificate, Transnet recommends that Respondents register their B-BBEE compliance and supporting documentation on the Department of Trade and Industry's [DTI] National B-BBEE IT Portal and Opportunities Network and provide Transnet with proof of registration in the form of an official B-BBEE Profile issued by the DTI.

Transnet would wish to use the DTI B-BBEE IT Portal as a data source for tracking B-BBEE compliance.

*For instructions to register and obtain a DTI B-BBEE Profile go to <http://bee.thedti.gov.za>*

## 5.4 Further Recognition Criteria

Transnet encourages its Service Providers to constantly strive to improve their B-BBEE rating. Whereas Respondents will be allocated points in terms of a preference point system based on its B-

BBEE scorecard to be assessed as detailed in paragraph 5.1 above, in addition to such scoring, a further **10% [ten per cent]** will be allocated to a Respondent's score based on the "Further Recognition Criteria" [**FRC**] on an ascending scale. This will be calculated based on the extent to which the Respondent commits to meet and/or exceed the minimum compliance targets with its proposed target score to be achieved during the contract period.

Respondents are required to submit their Further Recognition Criteria with their Proposals. *[Refer Section 17 for further instructions]*

#### 5.5 **Service Provider Development Initiatives**

Historically in South Africa there has been a lack of investment in infrastructure, skills and capability development and an inequality in the income distribution and wealth of a significant portion of the population. There have been a number of Government initiatives developed to address these challenges. In particular, the New Growth Path [**NGP**] developed in 2010 aligns and builds on previous policies to ensure the achievement of Government's development objectives for South Africa.

Transnet fully endorses and supports Government's New Growth Path policy through its facilitation of Service Provider Development [**SD**] initiatives.

### 6 **COMMUNICATION**

Respondents are warned that a Proposal will be liable to disqualification should any attempt be made by a Respondent either directly or indirectly to canvass any officer or employee of Transnet in respect of this RFP between the closing date and the date of the award of the business.

6.1 For specific queries relating to this RFP, a Bid Clarification Request Form should be submitted, substantially in the form set out in Section 12 hereto. In the interest of fairness and transparency Transnet's response to such a query will then be made available to the other Respondents who have collected RFP documents. For this purpose all Respondents need to indicate by email their intention to respond to this RFP by informing Transnet of their contact details as soon as possible but on or before 3 days prior the closing date to [prudence.nkabinde@transnet.net](mailto:prudence.nkabinde@transnet.net).

6.2 After the closing date of the RFP, a Respondent may communicate with the Secretary of the Transnet Acquisition Council, at telephone number 011 544 9486, email [prudence.nkabinde@transnet.net](mailto:prudence.nkabinde@transnet.net) or facsimile number 011 774 9186 on any matter relating to its RFP Proposal.

Respondents found to be in collusion with one another will be automatically disqualified and blacklisted from doing business with Transnet in the future.

MAY RESULT IN A PROPOSAL BEING REJECTED**

## RFP FOR THE ERECTION OF A CONCRETE PALISADE IN PHALABORWA

### Section 13: SERVICE PROVIDER CODE OF CONDUCT

Transnet aims to achieve the best value for money when buying or selling Services and obtaining services. This however must be done in an open and fair manner that supports and drives a competitive economy. Underpinning our process are several acts and policies that any Service Provider dealing with Transnet must understand and support. These are:

- The Transnet Procurement Procedures Manual [**PPM**];
- Section 217 of the Constitution - the five pillars of Public PSCM [Procurement and Supply Chain Management]: fair, equitable, transparent, competitive and cost effective;
- The Public Finance Management Act [**PFMA**];
- The Broad Based Black Economic Empowerment Act [**B-BBEE**]; and
- The Prevention and Combating of Corrupt Activities Act.

This Code of Conduct has been included in this RFP to formally apprise prospective Transnet Service Providers of Transnet's expectations regarding behaviour and conduct of its Service Providers.

#### **Prohibition of Bribes, Kickbacks, Unlawful Payments, and Other Corrupt Practices**

Transnet is in the process of transforming itself into a self-sustaining State Owned Company [SOC], actively competing in the logistics industry. Our aim is to become a world class, profitable, logistics organisation. As such, our transformation is focused on adopting a performance culture and to adopt behaviours that will enable this transformation.

*1. Transnet will not participate in corrupt practices and therefore expects its Service Providers to act in a similar manner.*

- Transnet and its employees will follow the laws of this country and keep accurate business records that reflect actual transactions with and payments to our Service Providers.
- Employees must not accept or request money or anything of value, directly or indirectly, to:
  - illegally influence their judgement or conduct or to ensure the desired outcome of a sourcing activity;
  - win or retain business or to influence any act or decision of any decision stakeholders involved in sourcing decisions; or
  - gain an improper advantage.
- There may be times when a Service Provider is confronted with fraudulent or corrupt behaviour of Transnet employees. We expect our Service Providers to use our "Tip-offs Anonymous" Hot line to report these acts [0800 003 056].

*2. Transnet is firmly committed to the ideas of free and competitive enterprise.*

- Service Providers are expected to comply with all applicable laws and regulations regarding fair competition and antitrust.

- Transnet does not engage with non-value adding agents or representatives solely for the purpose of increasing B-BBEE spend [fronting].
3. *Transnet's relationship with Service Providers requires us to clearly define requirements, exchange information and share mutual benefits.*
- Generally, Service Providers have their own business standards and regulations. Although Transnet cannot control the actions of our Service Providers, we will not tolerate any illegal activities. These include, but are not limited to:
    - misrepresentation of their product [e.g. origin of manufacture, specifications, intellectual property rights];
    - collusion;
    - failure to disclose accurate information required during the sourcing activity [e.g. ownership, financial situation, B-BBEE status];
    - corrupt activities listed above; and
    - harassment, intimidation or other aggressive actions towards Transnet employees.
  - Service Providers must be evaluated and approved before any materials, components, products or services are purchased from them. Rigorous due diligence is conducted and the Service Provider is expected to participate in an honest and straight forward manner.
  - Service Providers must record and report facts accurately, honestly and objectively. Financial records must be accurate in all material respects.

#### **Conflicts of Interest**

A conflict of interest arises when personal interests or activities influence [or appear to influence] the ability to act in the best interests of Transnet.

- Doing business with family members
- Having a financial interest in another company in our industry

## 6 DEFAULTS BY RESPONDENTS

- 6.1 If the Respondent, after it has been notified of the acceptance of its Bid fails to:
  - a) enter into a formal contract when called upon to do so in terms of clause 14 [*Contract Documents*], within such period as Transnet may specify; or

## **15 SECURITIES**

- 15.1 The successful Respondent, when called upon to do so, shall provide security to the satisfaction of Transnet for the due fulfilment of a contract or order. Such security shall be in the form of a deed of suretyship [**Deed of Suretyship**] furnished by an approved bank, building society, insurance or guarantee corporation carrying on business in South Africa.
- 15.2 The security may be applied in whole or part at the discretion of Transnet to make good any loss or damage which Transnet may incur in consequence of a breach of the contract or any part thereof.

- 15.5 Additional costs incurred by Transnet necessitated by reason of default on the part of the Service Provider in relation to the conditions of this clause 15 will be for the account of the Service Provider.

## 21 IMPORTANT NOTICE TO RESPONDENTS REGARDING PAYMENT

## PART B - SPECIFICATION FOR WORK NEAR HIGH-VOLTAGE ELECTRICAL EQUIPMENT

### 27.0 GENERAL

27.1 This specification is based on the contents of Transnet's publication ELECTRICAL SAFETY INSTRUCTIONS, as amended, a copy of which will be made available on loan to the Contractor for the duration of the contract.

These instructions apply to all work near "live" high-voltage equipment maintained and/or operated by the network operator, and the onus rests on the Contractor to ensure that he obtains a copy.

27.2 This specification must be read in conjunction with and not in lieu of the Electrical Safety Instructions.

27.3 The Contractor's attention is drawn in particular to the contents of Part I, Sections 1 and 2 of the Electrical Safety Instructions.

27.4 The Electrical Safety Instructions cover the minimum safety precautions which must be taken to ensure safe working on or near high-voltage electrical equipment, and must be observed at all times. Should additional safety measures be considered necessary because of peculiar local conditions, these may be ordered by and at the discretion of the Electrical Officer (Contracts).

27.5 The Contractor shall obtain the approval of the Electrical Officer (Contracts) before any work is done which causes or could cause any portion of a person's body or the tools he is using or any equipment he is handling, to come within 3 metres of any "live" high-voltage equipment.

27.6 The Contractor shall regard all high-voltage equipment as "live" unless a work permit is in force.

27.7 Safety precautions taken or barriers erected shall comply with the requirements of the Electrical Officer (Contracts), and shall be approved by him before the work to be protected is undertaken by the Contractor. The Contractor shall unless otherwise agreed, bear the cost of the provision of the barriers and other safety precautions required, including the attendance of the network operator's staff where this is necessary.

27.8 No barrier shall be removed unless authorised by the Electrical Officer (Contracts).

### 28.0 WORK ON BUILDINGS OR FIXED STRUCTURES

28.1 Before any work is carried out or measurements are taken on any part of a building, fixed structure or earthworks of any kind above ground level situated within 3 metres of "live" high-voltage equipment, the Electrical Officer (Contracts) shall be consulted to ascertain the conditions under which the work may be carried out.

28.2 No barrier erected to comply with the requirements of the Electrical Officer (Contracts) shall be used as temporary staging or shuttering for any part of the Works.

28.3 The shuttering for bridge piers, abutments, retaining walls or parapets adjacent to or over any track may be permitted to serve as a barrier, provided that it extends at least 2,5 metres above any working level in the case of piers, abutments and retaining walls and 1,5 metres above any working level in the case of parapets.

### 29.0 WORK DONE ON OR OUTSIDE OF ROLLING STOCK, INCLUDING LOADING OR UNLOADING

29.1 No person may stand, climb or work, whilst on any platform, surface or foothold:

29.1.1 higher than the normal unrestricted access way, namely -

29.1.1.1 external walkways on diesel, steam and electric locomotives, steam heat vans, etc. and

29.1.1.2 walkways between coaches and locomotives.

29.1.2 of restricted access ways in terms of the Electrical Safety Instructions namely -

29.1.2.1 the floor level of open wagons

29.1.2.2 external walkways or decks of road-rail vehicles, on-track maintenance machines and material trains.

29.1.3 Unauthorised staff working on these platforms must be directly supervised by duly authorised persons in terms of clause 607.1.3 of the Electrical Safety Instructions. These persons must attend the relevant electrical safety module training. A letter of training must then be issued by an accredited training authority. A Category C Certificate of Authority must be obtained from the

local depot examining officer.

- 29.2 When in the above positions no person may raise his hands or any equipment he is handling above his head.
- 29.3 In cases where the Contractor operates his own rail mounted equipment, he shall arrange for the walkways on this plant to be inspected by the Electrical Officer (Contracts) and approved, before commencement of work.
- 29.4 The handling of long lengths of material such as metal pipes, reinforcing bars, etc should be avoided, but if essential they shall be handled as nearly as possible in a horizontal position below head height.
- 29.5 The Responsible Representative shall warn all persons under his control of the danger of being near "live" high-voltage equipment, and shall ensure that the warning is fully understood.
- 29.6 Where the conditions in clauses 30.1 to 30.4 cannot be observed the Electrical Officer (Contracts), shall be notified. He will arrange for suitable Safety measures to be taken. The Electrical Officer (Contracts), may in his discretion and in appropriate circumstances, arrange for a suitable employee of the Contractor to be specially trained by the network operator and at the Contractor's cost, as an Authorised Person to work closer than 3 metres from "live" overhead conductors and under such conditions as may be imposed by the senior responsible electrical engineer of the network operator.

### **30.0 USE OF EQUIPMENT**

#### **30.1 Measuring Tapes and Devices**

- 30.1.1 Measuring tapes may be used near "live" high-voltage equipment provided that no part of any tape or a person's body comes within 3 metres of the "live" equipment.
- 30.1.2 In windy conditions the distance shall be increased to ensure that if the tape should fall it will not be blown nearer than 3 metres from the "live" high-voltage equipment.
- 30.1.3 Special measuring devices longer than 2 metres such as survey sticks and rods may be used if these are of non-conducting material and approved by the responsible Electrical Engineer of the network operator, but these devices must not be used within 3 metres of "live" high-voltage equipment in rainy or wet conditions.
- 30.1.4 The assistance of the Electrical Officer (Contracts) shall be requested when measurements within the limits defined in clauses 31.1.1 to 31.1.3 are required.
- 30.1.5 The restrictions described in 31.1.1 to 31.1.3 do not apply on a bridge deck between permanent parapets nor in other situations where a barrier effectively prevents contact with the "live" high-voltage equipment.

#### **30.2 Portable Ladders**

- 30.2.1 Any type of portable ladder longer than 2 metres may only be used near "live" high-voltage equipment under the direct supervision of the Responsible Representative. He shall ensure that the ladder is always used in such a manner that the distance from the base of the ladder to any "live" high-voltage equipment is greater than the fully extended length of the ladder plus 3 metres. Where these conditions cannot be observed, the Electrical Officer (Contracts) shall be advised, and he will arrange for suitable safety measures to be taken.

### **31.0 CARRYING AND HANDLING MATERIAL AND EQUIPMENT**

- 31.1 Pipes, scaffolding, iron sheets, reinforcing bars and other material which exceeds 2 metres in length shall be carried completely below head height near "live" high-voltage equipment. For maximum safety such material should be carried by two or more persons so as to maintain it as nearly as possible in a horizontal position. The utmost care must be taken to ensure that no part of the material comes within 3 metres of any "live" high-voltage equipment.
- 31.2 Long lengths of wire or cable shall never be run out in conditions where a part of a wire or cable can come within 3 metres of any "live" high-voltage equipment unless the Electrical Officer (Contracts) has been advised and has approved appropriate safety precautions.
- 31.3 The presence of overhead power lines shall always be taken account of especially when communications lines or cables or aerial cables, stay wires, etc. are being erected above ground level.

### **32.0 PRECAUTIONS TO BE TAKEN WHEN ERECTING OR REMOVING POLES, ANTENNAE, TREES ETC.**

- 32.1 A pole may be handled for the purpose of erection or removal near high-voltage equipment under the following conditions:

(i) If the distance between the point at which the pole is to be erected or removed and the nearest "live" high-voltage equipment is more than the length of the pole plus 3 metres, the work shall be supervised by the Responsible Representative.

(ii) If the distance described in (i) is less than the length of the pole plus 3 metres, the Electrical Officer (Contracts) shall be consulted to arrange for an Authorised Person to supervise the work and to ensure that the pole is earthed where possible. The pole shall be kept in contact with the point of erection, and adequate precautions shall be taken to prevent contact with "live" high-voltage equipment.

32.2 The cost of supervision by an Authorised Person and the provision of earthing shall, unless otherwise agreed, be borne by the Contractor.

32.3 The provisions of clauses 33.1 and 33.2 shall also apply to the erection or removal of columns, antennae, trees, posts, etc.

### 33.0 USE OF WATER

33.1 No water shall be used in the form of a jet if it can make contact with any "live" high-voltage equipment or with any person working on such equipment.

### 34.0 USE OF CONSTRUCTION PLANT

34.1 "Construction plant" entails all types of plant including cranes, piling frames, boring machines, excavators, draglines, dewatering equipment and road vehicles with or without lifting equipment.

34.2 When work is being undertaken in such a position that it is possible for construction plant or its load to come within 3 metres of "live" high-voltage equipment, the Electrical Officer (Contracts) shall be consulted. He will arrange for an Authorised Person to supervise the work and to ensure that the plant is adequately earthed. The Electrical Officer (Contracts) will decide whether further safety measures are necessary.

34.3 The cost of any supervision by an Authorised Person and the provision of earthing shall, unless otherwise agreed, be borne by the Contractor.

34.4 When loads are handled by cranes, non-metallic rope hand lines shall be used, affixed to such loads so as to prevent their swinging and coming within 3 metres of "live" high-voltage equipment.

34.5 Clauses 35.1 to 35.4 shall apply *mutatis mutandis* to the use of maintenance machines of any nature.

### 35.0 WORK PERFORMED UNDER DEAD CONDITIONS UNDER COVER OF A WORK PERMIT

35.1 If the Responsible Representative finds that the work cannot be done in safety with the high-voltage electrical equipment "live", he shall consult the Electrical Officer (Contracts) who will decide on the action to be taken.

35.2 If a work permit is issued the Responsible Representative shall-

(i) before commencement of work ensure that the limits within which work may be carried out have been explained to him by the Authorised Person who issued the permit to him, and that he fully understands these limits;

(ii) sign portion C of the permit before commencement of work;

(iii) explain to all persons under his control the limits within which work may be carried out, and ensure that they fully understand these limits;

36.2 Broken rails with an air gap between the ends, and joints at which fishplates are removed under "broken bond" conditions, are potentially lethal. The rails on either side of an air gap between rail ends on electrified lines shall not be touched simultaneously until rendered safe by the network operator personnel.

36.3 The Contractor shall not break any permanent bonds between rails or between rails and any structure. He shall give the Contract Supervisor at least 7 days written notice when removal of such bonds is necessary.

36.4 No work on the track which involves interference with the traction return rail circuit either by cutting or removing the rails, or by removal of bonds shall be done unless the Electrical Officer (Contracts) is consulted. He will take such precautions as may be necessary to ensure continuity of the return circuit before permitting the work to be commenced.

**37.0 HIGH-VOLTAGE ELECTRICAL EQUIPMENT NOT MAINTAINED AND/OR OPERATED BY THE NETWORK OPERATOR**

Where the work is undertaken on or near high-voltage electrical equipment which is not maintained and/or operated by the network operator, the Occupational Health and Safety Act No. 85 of 1993, and Regulations and Instructions, or the Mines Health and Safety Act (Act 29 of 1996), shall apply.

Such equipment includes:-

**CONCRETE FENCING**

Prestressed and precast concrete pallsade with purpose-made gates and overhangs. The company has been manufacturing and erecting the system for more than 18 years throughout the country e.g. about 100 sites for the Department of Posts and Telecommunications. The system is load-resistant enough for use as barrier fencing to crowd restraint. The system consist of easily transported components and is fast to erect. Even so, it resists vandalism and abuse and is difficult to dismantle without considerable effort. However, sections of the fence can be removed for temporary access, and replaced. In security applications, an advantage is that the system does not create a visual barrier, as the gaps between the poles are either 100 or 65 mm depending on the number of pales per section.

**Authority**  
 SABS 0100; 1980 The design of foundations for buildings.

**Composition and manufacture**  
 Off-shutter-finish concrete with wood-floated back, to 35 MPa at 28 days. All reinforcing is covered by at least 20 mm concrete. Reinforcing wires are of grade 1550/1700 MPa steel stressed to 75 % of UTS. Ends of all units are cut, ground level, and sealed with 2 part grey epoxy. Post reinforcing: 6 x 4 mm wires. Pale reinforcing: 4 x 2,65 mm wires. Rail reinforcing: 4 x 4 mm wires. Fixing bolts are electroplated and passivated. Concrete foundations are 15 MPa at 28 days.

**Size and mass**  
 Posts: 3 000 x 106 x 125 tapered to 100 mm  
 Pales: 2 370 x 64 x 115 tapered to 100 mm  
 A rail (9-pales/section): 1 950 x 60 x 150 with 9 x 10 mm holes for 8 mm carriage bolts.  
 B rail (11-pales/section): 1 990 x 65 x 150 with 11 x 10 mm holes for 8 mm carriage bolts.  
 Blanking plates: 850 x 300 x 40 mm or 1 500 x 200 x 40 mm.

**Appearance**  
 The system has a natural concrete finish. The tapered pales give the system a pleasing look.

**Strength**  
 Point loading of the structure at both post and mid section of the rail gives safety factors of 1,66 and 3,22 respectively. Point loading on individual pales and rails gives safety factors of 2,5 and 1,65 respectively.

**Site work**  
 Each post is sunk 600 mm into an excavated hole which is then filled with concrete. A blanking plate is set into the foundation at ground level. The rails are slotted to receive two horizontal rails of 60 and 2 250 mm from ground level. The system is completed by fitting in the rails either 9 or 11-pales per post.

**Accessories**  
 Security gates and eight different overhangs for barbed wire and razor tape.

**Service**  
 The company offers a full design and erection service.

**BETONOMHEIDING**

Vooral gesaagde en gepreë beton pallsade met dooie waardige hekke en oewerhangs. Vir meer as 18 jaar het die maatskappy Armoured Railfence opgerig, o.a. by meer as 100 terreine vir die Departement Posa en Telekommunikasie. Die stelsel bestaan uit maklik vervoerbare komponente en is steiloprigbaar. Noctans buid dit steiloprigbaar teen vandalisme en wangetrou en is dit moeilik om dit te demanteel sonder aansienlike vermoens. In die meeste gevalle kan dele van die hekkie vir tydelike toegangskategoriee verwyder en heringelê word. Die stelsel doen nie 'n visuele versperring skep nie, aangesien die oopruims tussen die pale, of 100 of 65 mm is, afhangende van die aantal pale per gedeelte.

**Magtiging**  
 SABS 0100; 1980 Die Ontwerp van fondasies vir geboue.

**Samstelling en vervaardiging**  
 Afsonderlike afgewerkte beton met houtvlootkrans, tot 35 MPa by 28 dae. Alle versterkings word bedek met minstens 20 mm beton bedek. Versterkende draad is van graad 1550/1700 MPa staalgeproe tot 75 % UTS. Die uite van alle eenhede word afgesleut en gesig met 2 dele grijs epoksijsuiwel. Postversterking: 6 x 4 mm draad. Spoorversterking: 4 x 2,65 mm draad. Reilversterking: 4 x 4 mm draad. Hekkings word elektroplaat en gepassiveer. Betonfondasies is 15 MPa.

**Grootte en massa**  
 Piler: 3 000 x 106 x 125 getuip tot 100 mm  
 Spoor: 2 370 x 64 x 115 getuip tot 100 mm  
 A reil (9 pale/afdeling): 1 950 x 60 x 150 met 9 x 10 mm gatte vir 8 mm kartriele.  
 B reil (11 pale/afdeling): 1 990 x 65 x 150 met 11 x 10 mm gatte vir 8 mm kartriele.  
 Afdelings: 850 x 300 x 40 of 1 500 x 200 x 40 mm.

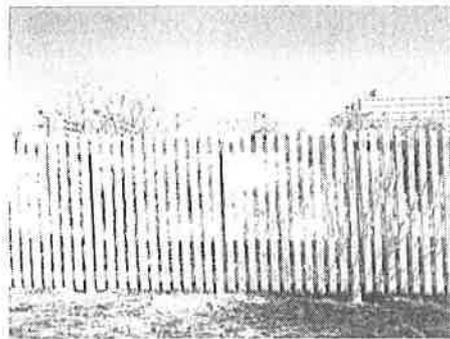

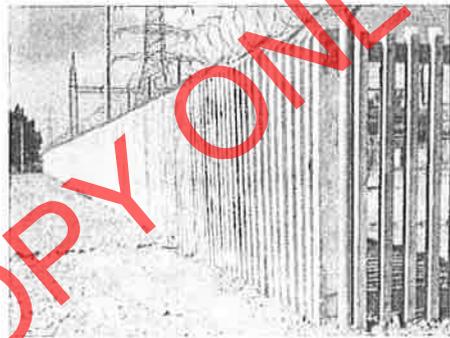

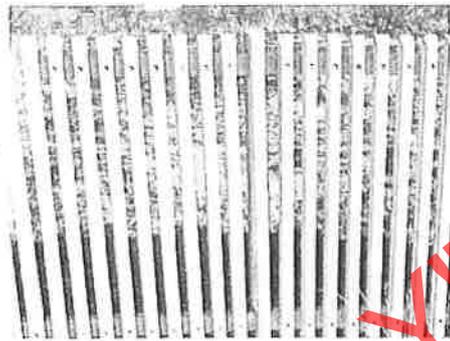

**Verhoed**  
 Die stelsel het 'n natuurlike betonafwerking. Die getuipde pale gee die stelsel 'n aantreklike voorkoms aan die oë.

**Strengte**  
 Puntlaai van die struktuur by beide post- en midseksies van die reil, verskaf veiligheidsfaktore van onderskeidelik, 1,66 en 3,22. Puntlaai op individuele pale en reil gee veiligheidsfaktore van, onderskeidelik, 2,5 en 1,65.

**Terreinwerk**  
 Elke post word in 'n 600 mm uitgesaagde gat ingelê, waarna dit met beton opgevul word. 'n Afdelingsplaat word by grondvlak in die fondasie afgedruk. Die pale word gesleut in die twee horisontale reilings teen 60 en 2 250 mm vanaf grondvlak te werk. Die stelsel word voltooi deur 9 of 11 spoor per pale van te hek.

**Bykomstighede**  
 Sekuriteitsgates en agt verskeide oewerhangs vir dooie draad en lampe.

**Diens**  
 Die maatskappy bied 'n volledige ontwerp- en oprigtingsdiens.
