N.B. – Unsafe cleaning detergents that will eat away the concrete grouting surrounding the tiles must be avoided.

10.1.3 Terrazzo

- Sweep clean of all dust – scrub with approved liquid detergent solution – wash down thoroughly with clean water – remove all excess water from surface with clean cloth.
- An approved water emulsion polish may be applied to mosaic tile walls and dados where a highly polished finish is desirable.

N.B. – Avoid unsafe cleaning detergents, acids or other corrosive liquids that may eat the concrete matrix away from the marble chips.

10.1.4 White or Coloured Rubbed Granite

- Sweep clean of all dust – scrub with approved liquid detergent solution – wash down thoroughly with clean water and remove all excess water with clean cloth.

N.B. – Avoid the use of metal brushes or wire wool.

10.1.5 Marble

- Sweep clean of all dust – scrub with warm water and a non-caustic detergent. Wash down with clean water and remove all excessive water with clean cloth.
- The surface may be polished where a brilliant finish is desirable. As required, a non-slippery liquid wax may be applied onto marble finishes.

N.B. – Avoid the use of acid which is harmful to marble.

10.1.6 Thermo-Plastic (asphalt or Vinyl) Tiles

- Sweep clean of all dust – wash with a weak solution of approved liquid detergent, wash down thoroughly with clean water and dry with clean cloth.
- Apply a thin film of water emulsion Polymer type polish which is self-polishing and dries with a bright surface in about 20 minutes.
- After repeated applications of polish, a “build-up” old polish may occur – this may be removed by the use of an approved concentrated detergent cleanser of the appropriate type of stripping agent.

10.1.7 Quarry Tiles

- Sweep clean of all dust – scrub with an approved liquid detergent solution - wash down thoroughly with clean water and dry thoroughly with clean cloth.
- If a dust free surface is required a coat of spirit solvent wax can be applied.
- Allow drying out and when thoroughly dried buff to a brilliant finish preferably with a suitable polishing machine.

10.1.11 Rubber Flooring

- Before waxing it is essential that the surface should be perfectly clean.
- Avoid excessive use of water as this might creep between the joints of the flooring and affect the adhesion of the rubber to the sub-floor.
- The best method of cleaning of the rubber floor is by means of a paste cleanser applied with a damp cloth.
- Thorough rinsing is essential, again a minimum amount of water should be used and the floor dried thoroughly with a clean cloth.
- Good quality bar or liquid soap can also be used but soft soaps with high alkalinity, liquids containing essential oils (e.g. turpentine and pine oil) and coarse abrasives should be avoided.
- When clean, the floor should be treated with an approved water emulsion Polymer type polish, which should be allowed to dry thoroughly before traffic is allowed to pass over it.

N.B. – Solvent based waxes should not be used on rubber floors. White spirit and other solvents such as petrol, benzene and paraffin attack rubber flooring causing it to become soft and sticky and “bleeding” of colours may occur.

10.1.12 Cork Flooring

- The floor should first be cleaned with a good quality neutral soap or detergent.
- A minimum amount of water should be used as excess water may seep between the tiles and loosen them from the floor.
- The floor should then be rinsed with clean water and thoroughly dried. Then dry steel wool (or gauze) may be used to remove stains and clean badly soiled areas.
- When dry, the floor should be sealed with either a polyurethane or oleo resinous seal. Such sealing is a specialized process and should not be attempted other than under experienced supervision.
- If the floor is not sealed, it then requires to treat the surface with several coats of high-grade polish or to fill up the pores. Over this base any polish including emulsions can be used. However, whatever polish is applied, it is to be stripped at regular intervals and followed by frequent maintenance detailed below.
- For subsequent maintenance, an occasional application of floor wax, either solvent bound or an emulsion polish will considerably extend the life of the seal and provide a better resistance to scuff marks.

10.1.13 Painted Surface (Oil)

- (i) Flat finish
 - Remove all surface dust with a soft brush, wipe down with damp cloth containing weak approved detergent solution. Wipe down with a clean damp cloth.
 - Persistent stains may be removed by the sparing use of a fine abrasive paste or powder.
- (ii) High gloss finishes
 - As above, but do not use any form of abrasive to remove stains.
 - The use of washing soda or any other highly alkaline material should also be avoided.
 - For a superior finish a high quality paste wax can be applied and buffed to the required finishes.

10.1.14 Stainless Steel

- To maintain the original bright and clean appearance, accumulation of deposit from the atmosphere must be prevented.
- Frequent careful washing with soap and water or an approved detergent solution will maintain appearance indefinitely.
- Avoid the use of abrasives and steel wool. Accumulated dirt may be removed by the use of nylon web pad.

10.1.15 Bronze Finishes

- Bright bronze must be kept free from dust during the process of toning down, so that the atmosphere may act on it evenly until the required colour is obtained. This action must then be checked and the surface preserved by building up on it (by frequent applications of wax polish) a coating of hard wax, impervious to moisture and easily polished.
- Chemically toned bronze requires the action of the atmosphere for a short time after fixing to "see" it to its permanent shade, during which it should be kept free from dust by occasionally cleaning with a little petrol. After which the surface should be protected in the same way as natural toned bronze.

N.B. – The usual kinds of metal polish, and oil such as paraffin, should on no account be used. An approved natural wax may be used. Apply with a cloth pad and allow to dry. When thoroughly dry buff to a brilliant finish.

10.1.16 Aluminium

- Thoroughly wash down with water containing non-alkaline soap or detergent and dry thoroughly with clean cloth. Accumulated dirt may be removed by the use of nylon pad. Occasional application of a wax polish may preserve an attractive appearance.

N.B. – Avoid the use of abrasive and steel wool.

10.1.17 Chrome Finishes

- Chrome finishes rarely require anything more than a rub down with a soft cloth, but to prevent pitting such finishes may be cleaned once a month with chrome cleaners.

10.2 Windows and blinds

- Blinds in offices to be deep cleaned twice a year;

- High windows to be cleaned four times a year;

10.10 Carpet shampooing/Dry cleansing to be done quarterly

(i) Rotary brush method – Dry vacuum the area first, then shampoo carpeting carefully with a good quality appropriately diluted liquid shampoo & to comply with the manufacturer’s instructions for operating the rotary machine. Use wet vacuum immediately to remove excessive water and slurry. After shampooing brush the carpet pile in the direction with a carpet pile brush and warn users not to walk on the carpet until it is completely dry. As a final operation, dry vacuum on the following day to remove any loose fluff and lint loosened by the refinishing process.

(ii) Dry foam method – Use a pile-lifting machine to run over the area first. A fully automatic dry-foam machine which converts the liquid shampoo & into a foaming fluffy solution will be operated (i)

lay the fluffy solution, (ii) scrub with brushes in one pass and in one direction and immediately suck up the slurry.

(iii) Steam extraction method – Use a fully automatic steam machine to jet heated solution of appropriately mixed water and shampoo into the carpet under pressure in one pass and in one direction and remove all loosened dirt instantly by simultaneous vacuum action.

N.B. – Before cleaning carpets with any of the above methods, it is essential to clear the room of all light furniture and scrub a small area to check for colourfastness and backing wetness. Only skilled operators are allowed to carry out such carpet shampooing and great care must be taken to prevent shrinkage and over-wetting. A second pass may be necessary in heavily soiled areas.

10.11 Strip and seal

10.11.1 Strip and seal should be done twice a year for vinyl and stone/ceramic floors.

A Proposal submitted by a Respondent will be subjected to review and acceptance or rejection of its proposed contractual terms and conditions by Transnet's Legal Counsel, prior to consideration for an award of business.

13 Security clearance

Acceptance of this bid could be subject to the condition that the Successful Respondent, its personnel providing the goods and its subcontractor(s) must obtain security clearance from the appropriate authorities to the level of CONFIDENTIAL/ SECRET/TOP SECRET. Obtaining the required clearance is the responsibility of the Successful Respondent. Acceptance of the bid is also subject to the condition that the Successful Respondent will implement all such security measures as the safe performance of the contract may require.

14 National Treasury's Central Supplier Database

Respondents are required to self-register on National Treasury's Central Supplier Database (CSD) which has been established to centrally administer supplier information for all organs of state and facilitate the verification of certain key supplier information. Transnet is required to ensure that price quotations are invited and accepted from prospective bidders listed on the CSD. Business may not be awarded to a Respondent who has failed to register on the CSD. The CSD can be accessed at <https://secure.csd.gov.za/>. Respondents are required to provide the following to Transnet in order to enable it to verify information on the CSD:

Supplier Number: _____ Unique registration reference number: _____.

15 Tax Compliance

Regulation 14 of the Preferential Procurement Regulations, 2011 issued in terms of the Preferential Procurement Policy Framework Act (PPPFA) states that no tender may be awarded to any person whose tax matters have not been declared by the South African Revenue Services (SARS) to be in order.

16.1 New Tax Compliance Status (TCS) System

SARS has implemented a new Tax Compliance Status (TCS) system in terms of which a taxpayer is now able to authorise any 3rd party to verify its compliance status in one of two ways: either through the use of an electronic access PIN, or through the use of a Tax Clearance Certificate obtained from the new TCS system.

Respondents are required to provide the following to Transnet in order to enable it to verify their tax compliance status:

Tax reference number: _____

Tax Clearance Certificate & TCC Number: _____ and PIN: _____.

16.2 Tax Compliance Requirements for Foreign Entities

Tax compliance requirements are not applicable to foreign bidders/individuals with no South African tax obligations. Where foreign bidders seek to be exempted from the requirement to submit a tax clearance certificate / tax clearance PIN issued by SARS, such entities are required to complete a sworn affidavit on their tax obligation categorization. The affidavit must confirm an answer of "No" to **all** questions below in order for a Respondent to be regarded as being exempt from submitting a tax clearance certificate or tax clearance PIN:

- a) Is the entity a tax resident of the Republic of South Africa (RSA)?
- b) Does the entity have a branch/locally registered entity in the RSA?
- c) Does the entity have a permanent establishment in the RSA?

- e) Is the entity liable in the RSA for any form of taxation in the current tax year?

If a Respondent's answers to any one (or more) of the questions above changes to a "Yes" at any time during the bid process and/or after award of the contract (should a particular Respondent be successful), then the Respondent undertakes to comply with its tax obligations and to report to Transnet accordingly with either a tax clearance certificate / tax clearance PIN issued by SARS.

32 TRANSNET'S LIST OF EXCLUDED TENDERERS (BLACKLIST)

32.1 All the stipulations around Transnet's blacklisting process as laid down in Transnet's Supply Chain Policy and Procurement Procedures Manual are included herein by reference. Below follows a condensed summary of this blacklisting procedure.

32.2 Blacklisting is a mechanism used to exclude a company/person from future business with Transnet for a specified period. The decision to blacklist is based on one of the grounds for blacklisting. The standard of proof to commence the blacklisting process is whether a "prima facie" (i.e. on the face of it) case has been established.

32.3 Depending on the seriousness of the misconduct and the strategic importance of the Goods/Services, in addition to blacklisting a company/person from future business, Transnet may decide to terminate some or all existing contracts with the company/person as well.

32.4 A supplier or contractor to Transnet may not subcontract any portion of the contract to a blacklisted company.

32.5 Grounds for blacklisting include: If any person/Enterprise which has submitted a Bid, concluded a contract, or, in the capacity of agent or subcontractor, has been associated with such Bid or contract:

- a) Has, in bad faith, withdrawn such Bid after the advertised closing date and time for the receipt of Bids;
- b) has, after being notified of the acceptance of his Bid, failed or refused to sign a contract when called upon to do so in terms of any condition forming part of the bid documents;
- c) has carried out any contract resulting from such bid in an unsatisfactory manner or has breached any condition of the contract;
- d) has offered, promised or given a bribe in relation to the obtaining or execution of the contract;
- e) has acted in a fraudulent or improper manner or in bad faith towards Transnet or any Government Department or towards any public body, Enterprise or person;
- f) has made any incorrect statement in a certificate or other communication with regard to the Service or his B-BBEE status and is unable to prove to the satisfaction of Transnet that:
 - (i) he made the statement in good faith honestly believing it to be correct; and
 - (ii) before making such statement he took all reasonable steps to satisfy himself of its correctness;

g) caused Transnet damage, or to incur costs in order to meet the contractor's requirements and which could not be recovered from the contractor;

h) has litigated against Transnet in bad faith.

32.6 Transnet recognizes that trust and good faith are pivotal to its relationship with its suppliers. When a dispute arises between Transnet and its supplier, the parties should use their best endeavours to resolve the dispute in an amicable manner, whenever possible. Litigation in bad faith negates the principles of trust and good faith on which commercial relationships are based. Accordingly, Transnet will not do business with a company that litigates against it in bad faith or is involved in any action that reflects bad faith on its part. Litigation in bad faith includes, but is not limited to the following instances:

a) Vexatious proceedings. These are frivolous proceedings which have been instituted without proper grounds;

b) Perjury. Where a supplier commits perjury either in giving evidence or on affidavit;

c) Scurrilous allegations. Where a supplier makes allegations regarding a senior Transnet employee which are without a proper foundation, scandalous, abusive or defamatory.

d) Abuse of court process. When a supplier abuses the court process in order to gain a competitive advantage during a bid process.

32.7 Where any person or Enterprise has been found guilty by a court of law, tribunal or other administrative body of a serious breach of any law, during the preceding 5 Years, such person/Enterprise may also be blacklisted. Serious breaches of the law would include but are not limited to corruption, fraud, theft, extortion, or contraventions of the Competition Act 89 of 1998 (e.g. collusive tendering). This process excludes minor convictions such as traffic offences or personal disagreements between parties which have no bearing on the business operations of the person or Enterprise.

32.8 Grounds for blacklisting include a company/person recorded as being a company or person prohibited from doing business with the public sector on National Treasury's database of Restricted Suppliers or Register of Tender Defaulters.

32.9 Companies associated with the person/s guilty of misconduct (i.e. entities owned, controlled or managed by such persons), any companies subsequently formed by the person(s) guilty of the misconduct and/or an existing company where such person(s) acquires a controlling stake may be considered for blacklisting. The decision to extend the blacklist to associated companies will be at the sole discretion of Transnet.

32.10 Any person or enterprise or company against whom a decision to blacklist has been taken, may make representations to the Chief Financial Officer of Transnet SOC Ltd, whose decision shall be final.
