**F.2.16.4** Where a tender submission is to be substituted, submit a substitute tender in accordance with the requirements of F.2.13 with the packages clearly marked as "SUBSTITUTE".

**F.2.17 Clarification of tender offer after submission**

Provide clarification of a tender offer in response to a request to do so from the employer during the evaluation of tender offers. This may include providing a breakdown of rates or prices and correction of arithmetical errors by the adjustment of certain rates or item prices (or both). No change in the competitive position of tenderers or substance of the tender offer is sought, offered, or permitted.

**Note:** sub clause F.2.17 does not preclude the negotiation of the final terms of the contract with a preferred tenderer following a competitive selection process, should the Employer elect to do so.

**F.2.18 Provide other material**

**F.2.18.1** Provide, on request by the employer, any other material that has a bearing on the tender offer, the tenderer's commercial position (including notarized joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the employer for the purpose of a full and fair risk assessment. Should the tenderer not provide the material, or a satisfactory reason as to why it cannot be provided, by the time for submission stated in the employer's request, the employer may regard the tender offer as non-responsive.

**F.2.18.2** Dispose of samples of materials provided for evaluation by the employer, where required.

Provide access during working hours to premises for inspections, tests and analysis as provided for in the tender data.

**F.2.22 Return of other tender documents**

If so instructed by the employer, return all retained tender documents within 28 days after the expiry of the validity period stated in the tender data.

**F.2.23 Certificates**

Include in the tender submission or provide the employer with any certificates as stated in the tender data.

**F.3 The employer's undertakings**

**F.3.1 Respond to requests from the tenderer**

**F.3.1.1** Unless otherwise stated in the Tender Data, respond to a request for clarification received up to five working days before the tender closing time stated in the Tender Data and notify all tenderers who drew procurement documents.

**F.3.1.2** Consider any request to make a material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used to prequalify a tenderer to submit a tender offer in terms of a previous procurement process and deny any such request if as a consequence

- a) an individual firm, or a joint venture as a whole, or any individual member of the joint venture fails to meet any of the collective or individual qualifying requirements;
- b) the new partners to a joint venture were not prequalified in the first instance, either as individual firms or as another joint venture; or
- c) in the opinion of the Employer, acceptance of the material change would compromise the outcome of the prequalification process.

**F.3.2 Issue Addenda**

If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date that tender documents are available until three days before the tender closing time stated in the Tender Data. If, as a result a tenderer applies for an extension to the closing time stated in the Tender Data, the Employer may grant such extension and, shall then notify all tenderers who drew documents.

Return tender offers received after the closing time stated in the Tender Data, unopened, (unless it is necessary to open a tender submission to obtain a forwarding address), to the tenderer concerned.

**F.3.4 Opening of tender submissions**

**F.3.4.1** Unless the two-envelope system is to be followed, open valid tender submissions in the presence of tenderers' agents who choose to attend at the time and place stated in the tender data. Tender submissions for which acceptable reasons for withdrawal have been submitted will not be opened.

- F.3.4.2** Announce at the meeting held immediately after the opening of tender submissions, at a venue indicated in the tender data, the name of each tenderer whose tender offer is opened and, where applicable, the total of his prices, preferences claimed and time for completion for the main tender offer only.
- F.3.4.3** Make available the record outlined in F.3.4.2 to all interested persons upon request.
- F.3.5 Two-envelope system**
- F.3.5.1** Where stated in the tender data that a two-envelope system is to be followed, open only the technical proposal of valid tenders in the presence of tenderers' agents who choose to attend at the time and place stated in the tender data and announce the name of each tenderer whose technical proposal is opened.
- F.3.5.2** Evaluate the quality of the technical proposals offered by tenderers, then advise tenderers who remain in contention for the award of the contract of the time and place when the financial proposals will be opened. Open only the financial proposals of tenderers, who score in the quality evaluation more than the minimum number of points for quality stated in the tender data, and announce the score obtained for the technical proposals and the total price and any preferences claimed. Return unopened financial proposals to tenderers whose technical proposals failed to achieve the minimum number of points for quality.
- F.3.6 Non-disclosure**
- Not disclose to tenderers, or to any other person not officially concerned with such processes, information relating to the evaluation and comparison of tender offers, the final evaluation price and recommendations for the award of a contract, until after the award of the contract to the successful tenderer.
- F.3.7 Grounds for rejection and disqualification**
- Determine whether there has been any effort by a tenderer to influence the processing of tender offers and instantly disqualify a tenderer (and his tender offer) if it is established that he engaged in corrupt or fraudulent practices.
- F.3.8 Test for responsiveness**
- F.3.8.1** Determine, after opening and before detailed evaluation, whether each tender offer properly received:
- complies with the requirements of these Conditions of Tender,
  - has been properly and fully completed and signed, and
  - is responsive to the other requirements of the tender documents.
- F.3.8.2** A responsive tender is one that conforms to all the terms, conditions, and specifications of the tender documents without material deviation or qualification. A material deviation or qualification is one which, in the Employer's opinion, would:
- detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Scope of Work,
  - significantly change the Employer's or the tenderer's risks and responsibilities under the contract, or
  - affect the competitive position of other tenderers presenting responsive tenders, if it were to be rectified.
- F.3.8.3** Reject a non-responsive tender offer, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.

### **F.3.9 Arithmetical errors, omissions and discrepancies**

**F.3.9.1** Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.

- c) arithmetic errors in:
  - i) line item totals resulting from the product of a unit rate and a quantity in bills of quantities or schedules of prices; or
  - ii) the summation of the prices.

**F.3.9.3** Notify the tenderer of all errors or omissions that are identified in the tender offer and either confirm the tender offer as tendered or accept the corrected total of prices.

**F.3.9.4** Where the tenderer elects to confirm the tender offer as tendered, correct the errors as follows:

- a) If bills of quantities or pricing schedules apply and there is an error in the line item total resulting from the product of the unit rate and the quantity, the line item total shall govern and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line item total as quoted shall govern, and the unit rate shall be corrected.
- b) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if bills of quantities apply) to achieve the tendered total of the prices.

## Broad-Based Black Economic Empowerment (B-BBEE)

### B-BBEE and preferencing scheme:

Transnet fully endorses and supports the Government's Broad-Based Black Economic Empowerment Programme and it is strongly of the opinion that all South African business enterprises have an equal obligation to redress the imbalances of the past.

Transnet would therefore prefer to do business with local business enterprises who share these same values and who are prepared to contribute to meaningful B-BBEE initiatives (including, but not limited to subcontracting and Joint Ventures) as part of their tender responses. Transnet will accordingly allow a "preference" in accordance with the 10% preference system, as per the Preferential Procurement Policy Framework Act 5 of 2000 (as amended), to companies who provide a B-BBEE Accreditation Certificate. All procurement and disposal transactions will be evaluated accordingly.

Consequently, when Transnet invites prospective suppliers to submit tenders for its various capital expenditure programmes, it urges tenderers (Large Enterprises and QSE's - see below) to have themselves accredited by any one of the various Accreditation Agencies approved by SANAS (the South African National Accreditation Systems, under the auspices of the Department of Trade and Industry)

In terms of Government Gazette No 32467, Notice No. 810 dated 31 July 2009, as from 1 February 2010 only B-BBEE Accreditation Certificates issued by SANAS approved Verification Agencies will be valid. However Accreditation Certificates issued before 1 February 2010, which are still within their 1 year validity period, will still be acceptable until their expiry date, provided that the accreditation has been undertaken in accordance with the latest Codes (i.e. those promulgated on 9 February 2007).

No certificate issued on or after 1 February 2010 by a Verification Agency which has not been approved by SANAS will be acceptable.

### 1. Enterprises will be rated by such agencies based on the following:

- a) **Large Enterprises (i.e. annual turnover >R35 million):**
  - Rating level based on all seven elements of the B-BBEE scorecard
- b) **Qualifying Small Enterprises – QSE (i.e annual turnover between R5 million and R35 million):**
  - Rating based on any four of the elements of the B-BBEE scorecard
- c) **Exempted Micro Enterprises – EME (i.e. annual turnover <R5 million):**
  - EMEs are exempted from B-BBEE accreditation

- Automatic rating of Level 4 B-BBEE irrespective of race of ownership, i.e. 100% B-BBEE recognition
- Black ownership >50% or Black Women ownership >30% automatically qualify as Level 3 B-BBEE, i.e. 110% B-BBEE recognition
- EME's should only provide documentary proof of annual turnover (i.e. audited financials) plus proof of Black ownership if Black ownership >50% or Black Women ownership >30%

In addition to the above, tenderers who wish to enter into a Joint Venture or subcontract portions of the contract to B-BBEE companies, must state in their tenders the percentage, of the total contract value that will be allocated to such B-BBEE companies, should they be successful in being awarded any business. A rating certificate in respect of such B-BBEE JV-partners and / or subcontractor(s), as well as a breakdown of the distribution of the aforementioned percentage must also be furnished with the tender response to enable Transnet to evaluate / adjudicate all tenders received on a fair basis.

Respondents will be required to furnish proof of the above to Transnet. (i.e. a detailed scorecard as stipulated above in respect of Large Enterprises and QSEs, or proof of turnover in respect of EMEs). Failure to do so will result in a score of zero being allocated for B-BBEE.

Turnover: Kindly indicate your company's annual turnover for the past year

ZAR.....

- If annual turnover <R5m, please attach audited financials.
- If annual turnover >R5m, please attach an accreditation certificate issued by an Accreditation Agency, together with all the relevant score sheets pertaining thereto.

In addition to the accreditation certificate, Transnet also requires that tenderers register their B-BBEE compliance and supporting documentation on the Department of Trade and Industry's ("DTI") National B-BBEE IT Portal and Opportunities Network and **provide Transnet with proof of registration in the form of an official B-BBEE Profile issued by the DTI.**

Transnet will use the DTI B-BBEE IT Portal as a single data source for its B-BBEE supplier selection criteria and procurement improvement programme by tracking compliance, understanding spend and by sourcing future procurement opportunities.

## 2. Instructions for registration and obtaining a DTI B-BBEE Profile:

1. Go to <http://bee.thedti.gov.za>
2. Click on B-BBEERegistry
3. Click on *Register or Login*
4. Click on *Click Here to Register*

5. Complete the registration page
6. Once registered, click on *List on Registry*
7. Follow all 'on-screen' and e-mailed instructions to submit your documentation and obtain your Profile

### **Socio-Economic Obligations for Foreign Tenderers:**

Foreign tenderers, who do not have local agencies or other corporate representation in South Africa, will not be evaluated in terms of the B-BBEE requirements but will fall under the associated South African Government's initiative, namely, the Competitive Supplier Development Programme ("CSDP") as developed by the Department of Public Enterprises, details of which can be viewed at the Railways and Harbours Supply Chain Association's website, [www.rhsupplychain.com](http://www.rhsupplychain.com)

A 10% preference system (i.e. equivalent to the B-BBEE preference points above) will be allocated for the evaluation of a tenderer's offer under its socio-economic obligations in relation to the CSDP.

- Suppliers are expected to comply with all applicable laws and regulations regarding fair competition and antitrust practices.
- Transnet does not engage with non-value adding agents or representatives solely for the purpose of increasing BBBEE spend (fronting).

**3. Transnet's relationship with suppliers requires us to clearly define requirements, to exchange information and share mutual benefits.**

- Generally, suppliers have their own business standards and regulations. Although Transnet cannot control the actions of our suppliers, we will not tolerate any illegal activities. These include, but are not limited to:
  - Misrepresentation of their product (origin of manufacture, specifications, intellectual property rights, etc);

This shall include remedial action against dust, potholes, stoniness, corrugations, ruts, cracks, ravelling, slipperiness and erosion all as per the TRH 20 document.

##### **Material selection**

The gravel used for the final layer shall be suitable grading material as recommended in TRH 20 (Dr. Paige-Green – Transportek, CSIR) this material shall fall in the "E - block" (good). IE: Shrinkage Product ( $S_p$ )<sup>b</sup> between 100-250 with a grading coefficient ( $G_c$ )<sup>c</sup> between 16-34.

The CBR shall not be less than 15% at 95% Mod. AASHO compaction at OMC<sup>d</sup> when tested immediately after compaction. No material shall be greater than 37.5mm (passing a 37,5mm sieve). The grading operator (grader and rollers) shall be done by skilled operators to give a solid well-finished gravelled surface to a camber of 3% as recommended in the practical guide.

Caution must be taken not to damage water pipes and electrical cables.

##### **Storm Water Channels (Mitre Drains and Turnouts)**

Allowance to be made for storm water chain furrows to lead away from the road by forming mitre drains and turnouts. The open channels shall have a fall of 2% (1:50) see detail diagram A.

##### **Mixing and watering**

The compaction shall be kept moist during construction with a moisture content that will be the optimum for the construction equipment employed. The equipment shall be capable of achieving the densities as specified elsewhere in these Specifications. Only approved water of good quality shall be used.

The required amount of water shall be added by repeated trips of approved pneumatic tyre water lorries fitted with two or more sprinkler bars. Wherever possible most of the required water shall be added on the day preceding compaction, in order to obtain a more uniform distribution.

Thorough mixing of water with the material to be compacted shall be carried out with approved equipment and continued until a uniform and homogeneous mixture is obtained to the satisfaction of the Project Manager.

### **Compactions**

Compaction of each layer under construction shall only be carried out when the material in that layer has been mixed and watered to the satisfaction of the Project Manager. Compaction shall be carried out over the full width of the layer under construction by means of approved plant and equipment and shall continue until the whole layer has attained a density as specified in the contract.

The Contractor shall advise the Project Manager when the compaction of the layer has been carried out to the extent required. The contractor shall conduct the necessary field density tests under the supervision of the Project Manager and forward the results for approval (see Section 10). The Project Manager may instruct the Contractor to re-compact at his own expense any section of the layer, which has not been compacted as specified. If he deems it necessary the Project Manager may instruct the Contractor to cut out any weak spot, repair it with sound material, and re-compact it all at his own expense to the satisfaction of the Project Manager. The Contractor shall repair in a similar manner all damage caused by any field density tests having been carried out. When the Project Manager is satisfied with the compaction obtained he will authorise the construction of the following layer; in no case shall any materials be placed on the approved layer without the prior written authorization of the Project Manager. The finished surface shall also be free from potholes, corrugations, ruts, loose patches, depressions or humps and shall present a hard compacted layer.

## **SECTION 2**

### **FORMATION LAYER:**

#### **Disposal of soil**

All excavated material and other surplus material or backfill shall be carted and disposed of by the contractor to an approved dumpsite.

#### **Sub-Base**

Existing gravel road to be filled compacted and prepare to grade. Where necessary allow for extra material to complement the existing and to assist in reshaping the new profiles.

Grade the existing road to the required geometries shape and to form drainage along the edge, elsewhere described. Width of road to be 5 m. Allow for the wetting of the road to the correct moisture content so as to be able to form the sub-base. The cross fall shall not be greater than 5% and less than 3% (1:20 to 1:33, 3)

Use a roller and keep the road moist to compact the road to 90% mod AASTHO using gravel as before described and a CBR of 5% (minimum). Leave the road ready for the new base course.

#### **Mixing and watering**

As per cl 1.8.4 of this part "B".

#### **Sub-standard materials**

The Contractor shall not order or deliver to the site any material, which has not been approved by the Project Manager. If sub-standard material is delivered, the Project Manager may order the Contractor to remove all such material from the site and the cost of material and cartage shall be for the Contractor's account.

#### **Material**

The sub-base shall be the institute road and worked by adding imported material to give a formation as specified and to receive the top (base) layer.

Materials shall contain no vegetable matter, rubbish or other deleterious matter, and shall conform to the following Specifications:-

A minimum CBR of 5% at 90% Modified AASHTO Density.

**Grading and Placing of materials and wetting**

The sub-grade material shall be spread out over the full width specified and shall be thoroughly mixed and broken up by rotary cultivator, balding or dicing to ensure that there are no clods or lumps which might prevent the uniform distribution of the material. Breaking up of clods or lumps shall in no way affect layers already compacted and approved. The mixing and wetting of the material shall be done in accordance with the provisions of Clause 1.8 the minimum thickness placed for any lift shall be 100mm.

**Compaction**

The compaction of the selected layer of the sub-grade course shall be done as described in Clause 1.8.5 But to a minimum degree of compaction required would be at least 90% of Mod AASTHO.

The finished surface of the sub-base shall be free from depressions exceeding 15mm when measured with a straight edge 3m long.

**SECTION 3**

**STORM WATER**

**Furrows:**

Where necessary allow for open drainage channels and form furrows to drain storm water away from the road. This is to be on the "runoff" sides and will be to various depths and to a minimum fall of 1 in 100 (1%) and a maximum of 1 in 50 (2%).

**Outlets:**

Form outlets alongside the road as required and lead the storm water from the furrow so as to drain the storm water into the open land. Or lead the storm water to lead to other storm water channel or river or form an excavated pit to allow the water to drain naturally into the ground.
