  - Plus other amounts to be paid to the Contractor (including any tax which the law requires the Employer to pay to the Contractor)
  - Less amounts to be paid by or retained from the Contractor
- The Employer corrects any wrongly assessed amount due and notifies the Contractor of the correction before paying the Contractor.
- The Contractor pays delay damages for each day from the completion date until completion.
- An amount is retained from the Contractor in the assessment of each amount due until completion. This amount retained is halved in the first assessment made after completion and remains at this amount until the assessment day after the Defects Certificate is issued. No amount is retained in the assessment made after the Defects Certificate has been issued.
- If the Employer requires a programme to be submitted, one quarter of the price for work done to date is retained assessment of the amount due until the Contractor has

submitted a first programme to the Employer showing the information which the works information requires.

- The Employer pays within three weeks after the next assessment day which follows receipt of an application for payment by the Contractor.
- Interest is paid if a payment is late or includes a correction of an earlier payment. Interest is assessed from the date by which the correct payment should have been made until the date when it is paid. Interest is calculated at the rate stated in the Contract Data or, if none is stated, at 0.5% of the delayed amount per complete week of delay.

## **6. Compensation events**

### **6.1 Compensation events**

- The following are compensation events;
  1. The Employer gives an instruction changing the Works Information unless the change is in order to make a defect acceptable.
  2. The Employer does not allow access to and use of the site to the Contractor as necessary for the work included in this contract.
  3. The Employer does not provide something which he is to provide by the date for providing it stated in this contract.
  4. The Employer gives an instruction to stop or not to start any work.
  5. The Employer does not work within the conditions stated in the works information.
  6. The Employer does not reply to a communication from the Contractor within the period required by this contract.
  7. The Employer changes a decision which he has previously communicated to the Contractor.
  8. The Employer instructs the Contractor to search for a defect and no defect is found.
  9. The Contractor encounters physical conditions which;
    - Are within the site,
    - Are not weather conditions and
    - An experienced contractor would have judged, at the date of the Contractor's Offer, to have such a small chance of occurring that it would have been unreasonable to have allowed for them. Only the difference between the physical conditions encountered and those for which it would have been reasonable to have allowed is taken into account in assessing a compensation event.
  10. The Contractor is prevented by whether from carrying out all work on the site for periods of time, each at least one full working day, which are in total more than one seventh of the total number of days between the starting date and the completion date. In assessing this even, only the working days which exceed this limit and on which work is prevented by no other cause are taken into account.
  11. The Employer notifies a correction to an assumption which he has stated about a compensation event.

12. An event which;

- Stops the Contractor completing the works or
- Stops the Contractor completing the works by the completion date and which
- Neither party could prevent,
- An experienced contractor would have judged at the date of the Contractor's offer to have such a small chance of occurring that it would have been unreasonable for him to have allowed for it and
- Is not one of the other compensation events stated in this contract.

13. A difference between the final total quantities of work done and the quantity stated for an item in the price list.

14. A loss of or damage to the works, plant and materials which;

- Is not the fault or responsibility of the Contractor or
- Could not have been prevented by any reasonable action of the Contractor.

➤ In judging the physical conditions for the purposes of assessing any compensation even, the Contractor is assumed to have taken into account

- The site information,
- Publicly available information referred to in the site information
- Information obtainable from a visual inspection of the site and
- Other information which an experienced contractor could reasonably be expected to have or to obtain.

**7. Notifying compensation events**

➤ The Contractor notifies the Employer of an event which has happened or which he expects to happen as a compensation event if;

- The Contractor believes that the event is a compensation event and
- The Employer has not notified the event to the Contractor.

If the Contractor does not notify a compensation event within eight weeks of becoming aware of the event he is not entitled to a change in the prices or completion date unless the event arises from an instruction of the Employer.

➤ If the Employer decides that an event notified by the Contractor

- Arises from a fault of the Contractor,
- Has not happened and is not expected to happen,
- Has no effect upon the defined cost or upon completion or
- Is not one of the compensation events stated in this contract, he notifies the Contractor of his decision that the prices and the completion date are not to be changed.

If the Employer decides otherwise, he instructs the Contractor to submit a quotation for the event. The Employer notifies the decision to the Contractor or instructs the Contractor to submit a quotation within one week of the Contractor's notification to the Employer of the event.

- If the Employer decides that the Contractor did not give an early warning of the event which the Contractor could have given, the Employer notifies that decision to the Contractor when instructing the Contractor to submit a quotation.
- If the Employer decides that the effects of a compensation event are too uncertain to be forecast reasonably, the Employer states assumptions about the event when instructing the Contractor to submit a quotation. Assessment of the event is based on these assumptions. If any of them is later found to have been wrong, the Employer notifies a correction.
- A compensation event is not notified after the defects date.

#### **8. Quotations for compensation events**

- A quotation for a compensation event comprises proposed changes to the prices or rates and any delay to the completion date assessed by the Contractor. The Contractor submits details of his assessment with each quotation. The Contractor submits a quotation within two weeks of being instructed to do so by the Employer or, if no such instruction is received, within two weeks of the notification of a compensation event.
- The Employer may instruct the Contractor to submit a quotation for a proposed instruction or a proposed changed decision. The Contractor does not put a proposed instruction or a proposed changed decision into effect.
- The Employer replies within two weeks of the Contractor's submission. For a proposed instruction or proposed changed decision the Employer's reply is
  - Notification that the proposed instruction will not be given or the proposed changed decision will not be made,
  - Notification of the instruction or changed decision as a compensation event and acceptance of the quotation or
  - Notification of the instruction or changed decision as a compensation event and notification that the Employer does not agree with the quotation.

For other compensation events, the Employer's reply is

- Acceptance of the quotation or
- Notification that the Employer does not agree with the quotation.

If the Employer does not agree with the quotation, the Contractor may submit a revised quotation within two weeks of the Employer's reply. If the Employer does not agree with the revised quotation or if none is received, the Employer assesses the compensation event and notifies the assessment.

- After discussion with the Contractor different ways of dealing with the compensation event which are practicable, the Employer may instruct the Contractor to submit alternative quotations for a compensation event.

#### **9. Assessing compensation events**

- For a compensation event which only affects the quantities of work shown in the Price List, the change to the prices is assessed by multiplying the changed quantities of work by the appropriate rates in the Price List.
- For other compensation events, the changes to the prices are assessed by forecasting the effect of a compensation event upon the defined cost or, if the compensation event has already

occurred, the assessment is based upon the defined cost due to the event which the Contractor has incurred. Effects on defined cost as assessed separately for

- People employed by the Contractor,
- Plant and materials,
- Work subcontracted by the Contractor and
- Equipment

The Contractor shows how each of these effects is built up in each quotation for a compensation event. The percentages for overheads and profit stated in the Contractor's offer are applied to the assessed effect of the event on the defined cost.

- The effects of compensation events upon the defined cost are assessed at open market or competitively tendered prices with deductions for all discounts, rebates and taxes which can be recovered. The following are deducted from the defined cost for the assessment of compensation events;
  - The cost of events for which this contract requires the Contractor to insure and
  - Other costs paid to the Contractor by insurers.
- A delay to the completion date is assessed as the length of time that, due to the compensation event, completion is forecast to be delayed.
- If the Employer has decided and notified the Contractor that the Contractor did not give an early warning of a compensation event which an experienced contractor could have given, the event is assessed as if the Contractor had given early warning.
- Assessment of the effects of a compensation event includes risk allowances for cost and time for matters which are at the Contractor's risk under this contract.
- Assessments are based on the assumptions that the Contractor reacts competently and promptly to the compensation event and that any additional cost and time due to the event are reasonably incurred.
- A compensation event which is an instruction to change the works information in order to resolve an ambiguity or inconsistency is assessed as if the prices and completion date were for the interpretation most favourable to the party which did not provide the works information.
- The assessment of a compensation event is not revised if a forecast upon which it is based is shown by later recorded information to have been wrong.

## **10. Title**

### **10.1 Objects and materials within the site**

- The contractor has not title to an object of value or of historical or other interest within the site. The Contractor does not move such an object unless instructed to do so by the Employer.
- The Contractor has title to materials from excavation and demolition only as stated in the works information.

## **11. Indemnity, insurance and liability**

### **11.1 Limitation of liability**

- For any one event, the liability of the Contractor to the Employer for loss of or damage to the Employer's property is limited to the amount stated in the Contract Data. The Contractor is not liable to the Employer for the Employer's indirect or consequential loss

except as provided for in the conditions of contract. Exclusion or limitation of liability apprise in contract, tort or delict and otherwise and to the maximum extent permitted in law.

### **11.2 Indemnities**

- The Employer indemnifies the Contractor against claims, proceedings, compensation and costs payable which are the unavoidable result of the works or of providing the works or which arise from
  - Fault,
  - Negligence,
  - Breach of statutory duty,
  - Infringement of an intellectual property or
  - Interference with a legal right by the Employer or by a person employed by or contracted to the Employer except the Contractor
- The Contractor indemnifies the Employer against other
  - Losses and claims in respect of
  - Death of or injury to a person and
  - Loss of and damage to property (other than the works, plant and materials) and
  - Claims, proceedings, compensation and costs payable arising from or in connection with the Contractor are providing the works.
- The liability of one party to indemnify the other is reduced to the extent that events which are the other party's responsibility contributed to the losses, claims, proceedings, compensation and costs.

### **11.3 Insurance cover**

- The Contractor provides, in the joint names of the parties and from the starting date, the insurances stated in the Insurance Table. The Contractor does not provide an insurance which the Employer is to provide as stated in the Contract Data.

## **12. Termination and dispute resolution**

### **12.1 Termination and reasons for termination**

- If either party wishes to terminate the Contractor's obligation to provide the works, he notifies the other party giving details of his reason for terminating. The Employer issues a termination certificate promptly if the reason complies with this contract. After a termination certificate has been issued, the Contractor does no further work necessary to provide the works.
- Either party may terminate if the other party has become insolvent or its equivalent (Reason 1)
- The Employer may terminate if the Employer has notified the Contractor that the Contractor has defaulted in one of the following ways and the Contractor has not stopped defaulting within two weeks of the notification.
  - Substantially failed to comply with this contract (Reason 2)
  - Substantially hindered the Employer (Reason 3)
  - Substantially broken a health or safety regulation (Reason 4)

- The Employer may terminate for any other reason (Reason 5)
- The Contractor may terminate if
  - The Employer has not made a payment within ten weeks of the assessment day which followed receipt of the Contractor's application for it (Reason 6) or
  - The Employer has instructed the Contractor to stop or not to start any substantial work or all work for a reason which is not the Contractor's fault and an instruction allowing the work to re-start or start has not been given within eight weeks (Reason 7)
- The Employer may terminate if an event which the parties could not reasonably prevent has substantially affected the Contractor's work for a continuous period of more than thirteen weeks (Reason 7).

#### **12.2 Procedures on termination.**

- On termination, the Employer may complete the works himself or employ other people to do so. The Contractor leaves the site and removes the equipment.

#### **12.3 Payment on termination**

- The amount due on termination include;
  - An amount due assessed as for normal payments,
  - The cost of plant and materials provided by the Contractor which are on the site or of which the Contractor has to accept delivery and
  - Any amounts retained by the Employer.
- If the Employer terminates for Reason 1, 2, 3 or 4, the amount due on termination also includes a deduction of the forecast additional cost to the Employer of completing the works.
- If the Contractor terminates for reason 1, 6 or 7, or if the Employer terminates for Reason 5, the amount due on termination also includes 5% of any excess of a forecast of the amount due at completion had there been not termination over the amount due on termination assessed as for normal payments.

#### **12.4 Dispute resolution**

- A dispute arising under or in connection with this contract is referred to and decided by the Adjudicator.
- **The Adjudicator**
  - The parties appoint the Adjudicator under the NEC Adjudicator's contract current at the starting date. The Adjudicator acts impartially and decides the dispute as an independent adjudicator and not as an arbitrator.
  - If the Adjudicator is not identified in the Contract Data or if the Adjudicator resigns or is unable to act, the parties choose a new adjudicator jointly. If the parties have not chosen an adjudicator, either party may ask the Adjudicator nominating body to choose one. The Adjudicator nominating body chooses an adjudicator within four days of the request. The chosen adjudicator becomes the Adjudicator.

- The Adjudicator, his employees and agents are not liable to the parties for any action or failure to take action in adjudication unless the action or failure to take action was in bad faith.

➤ ***The adjudication***

- A party may refer a dispute to the Adjudicator if;
  - The party notified the other party of the dispute within four weeks of becoming aware of it and
  - Between two and four further weeks have passed since the notification.

If a disputed matter is not notified and referred within the times set out in this contract, neither party may subsequently refer it to the Adjudicator or the tribunal.

- The party referring the dispute to the Adjudicator includes with his referral information to be considered by the Adjudicator. Any more information is provided within two weeks of the referral. This period may be extended if the Adjudicator and the parties agree.
- The Adjudicator may take the initiative in ascertaining the facts and the law related to the dispute. He may instruct a party to take any other action which he considers necessary to reach his decision and to do so within a stated time.
- A communication between a party and the Adjudicator is communicated to the other party at the same time.
- If the Adjudicator's decision includes assessment of additional cost or delay caused to the Contractor, he makes his assessment in the same way as a compensation event is assessed.
- The Adjudicator decides the dispute and notifies the parties of his decision and his reasons within four weeks of the referral. This period may be extended by up to two weeks with the consent of the referring party, or by any period agreed by the parties. If the Adjudicator does not notify his decision within the time allowed, either party may act as if the Adjudicator has resigned.
- Unless and until the Adjudicator has notified the parties of his decision, the parties proceed as if the matter disputed was not disputed.
- The Adjudicator's decision is binding on the parties unless and until revised by the tribunal and is enforceable as a matter of contractual obligation between the parties and not as an arbitral award. The Adjudicator's decision is final and binding if neither party has notified the other within the times required by this contract that he intends to refer the matter to the tribunal.

**12.5 A party may refer a dispute to the tribunal if;**

- The party is dissatisfied with the Adjudicator's decision or
- The Adjudicator did not notify a decision within the time allowed and a new adjudicator has not been chosen, except that neither party may refer a dispute to the tribunal unless they have notified the other party of their intention to do so not more than four weeks after the end of the time allowed for the Adjudicator's decision.

## 4 USE OF BID FORMS

- 4.1 Where special forms and/or formats are issued by Transnet for the submission of Bids, Respondents are required to submit their Bids by completion of the appropriate sections on such official forms and/or formats and not in other forms and/or formats or documents bearing their own terms and conditions of contract. Non-compliance with this condition may result in the rejection of a Bid.
- 4.2 Respondents must note that the original Bid forms and/or formats must be completed for submission and not a reprocessed copy or other format thereof.
- 4.3 Only if insufficient space has been allocated to a particular response may a Respondent submit additional information under separate cover using the Company's letterhead. This must be duly cross-referenced in the RFX.

Respondents may be requested to attend a site visit or briefing session where it is necessary to view the site in order to prepare their Bids, or where Transnet deems it necessary to provide Respondents with further information to allow them to complete their Bids properly. Where such visits or sessions are indicated as compulsory in the RFX Document, Respondents are obliged to attend these meetings as failure to do so will result in their disqualification.

## **8 CLARIFICATION BEFORE THE CLOSING DATE**

Should clarification be required on any aspect of the Bid before the closing date, the Respondent must direct such queries to the contact person listed in the RFX Document in the stipulated manner.

## **9 COMMUNICATION AFTER THE CLOSING DATE**

## **12 RETURNABLE DOCUMENTS**

## **17 EXCHANGE AND REMITTANCE**

- 17.1 The Respondent should note that where the whole or a portion of the contract or order value is to be remitted overseas, Transnet shall, if requested to do so by the Supplier, effect payment overseas directly to the foreign principal or manufacturer of such percentage of the contract or order value as may be stipulated by the Respondent in its Bid Documents.
- 17.2 It is Transnet's preference to enter into Rand-based agreements. Transnet would request, therefore, that the Respondent give favourable consideration to obtaining forward exchange cover on the foreign currency portion of the Agreement at a cost that is acceptable to Transnet to protect itself against any currency rate fluctuation risks for the duration of any resulting contract or order.

- 17.3 The Respondent who desires to avail itself of the aforementioned facility must at the time of bidding furnish the information called for in the Exchange and Remittance section of the Bid Documents and also furnish full details of the principals or manufacturer to whom payment is to be made.
- 17.4 The South African Reserve Bank's approval is required before any foreign currency payments can be made to or on behalf of Respondents.

Any such submission shall be subject to review by Transnet's Legal Counsel who shall determine whether the proposed amendments /alternative(s) are acceptable or otherwise, as the case may be.

## **21 CONTRACT DOCUMENTS**

- 21.1 The contract documents will comprise these General Bid Conditions, the Terms and Conditions of Contract and any schedule of "Special Conditions" which form part of the Bid Documents.
- 21.2 The abovementioned documents together with the Respondent's Bid response will constitute the contract between the parties upon receipt by the Respondent of Transnet's letter of acceptance / intent, subject to all additional amendments and/or special conditions thereto as agreed to by the parties.

21.3 Should Transnet inform the Respondent that a formal contract will be signed, the abovementioned documents together with the Respondent's Bid response [and, if any, its covering letter and any subsequent exchange of correspondence] as well as Transnet's Letter of Acceptance/Intent, shall constitute a binding contract until the final contract is signed.

Litigation in bad faith includes, but is not limited to the following instances:

- 2.2 Without limiting the generality of the provisions of 2.1, any duly authorised representative of Transnet, having identified himself, may stop the work if, in his opinion, the safe passage of trains or the safety of Transnet assets or any person is affected. **CONSIDERATIONS OF SAFETY SHALL TAKE PRECEDENCE OVER ALL OTHER CONSIDERATIONS.**

### **3. CONTRACTOR'S REPRESENTATIVES**

- 3.1 The Contractor shall nominate Responsible Representatives of whom at least one shall be available at any hour for call-out in cases of emergency. The Contractor shall provide the Technical Officer with the names, addresses and telephone numbers of the representatives.
- 3.2 The Contractor guarantees that he has satisfied himself that the Responsible Representative is fully conversant with this specification and that he shall comply with all his obligations in respect thereof.

### **4. OCCUPATIONS AND WORK PERMITS**

- 4.1 Work to be done during total occupation or during an occupation between trains or under a work permit shall be done in a manner decided by the Technical Officer and at times to suit Transnet requirements.
- 4.2 The Contractor shall organise the Works in a manner, which will minimise the number and duration of occupations and work permits required.
- 4.3 Transnet will not be liable for any financial or other loss suffered by the Contractor arising from his failure to complete any work scheduled during the period of an occupation or work permit.
- 4.4 The Contractor shall submit to the Technical Officer, in writing, requests for occupations or work permits together with details of the work to be undertaken, at least 14 days before they are required. Transnet does not undertake to grant an occupation or work permit for any particular date, time or duration.
- 4.5 Transnet reserves the right to cancel any occupation or work permit at any time before or during the period of occupation or work permit. If, due to cancellation or change in date or time, the Contractor is not permitted to start work under conditions of total occupation or work permit at the time arranged, all costs caused by the cancellation shall be born by the Contractor except as provided for in clauses 4.6 to 4.8.

- 4.6 When the Contractor is notified less than 2 hours before the scheduled starting time that the occupation or work permit is cancelled, he may claim reimbursement of his direct financial losses caused by the loss of working time up to the time his labour and plant are employed on other work, but not exceeding the period of the cancelled occupation or work permit.
- 4.7 When the Contractor is notified less than 2 hours before the schedule starting time, or during an occupation or work permit, that the duration of the occupation or work permit is reduced, he may claim reimbursement of his direct financial losses caused by the loss of working time due to the reduced duration of the occupation or work permit.
- 4.8 Reimbursement the Contractor for any loss of working time in terms of 4.6 and 4.7, shall be subject to his claims being submitted within 14 days of the event with full details of labour and plant involved, and provided that the Technical Officer certifies that no other work on which the labour and plant could be employed was immediately available.
- 4.9 Before starting any work for which an occupation has been arranged, the Contractor shall obtain from the Technical Officer written confirmation of the date, time and duration of the occupation.
- 4.10 Before starting any work for which a work permit has been arranged, the Responsible Representative shall read and sign portion C of form No. T. 1276 signifying that he is aware of the limits within which work may be undertaken. After the work for which the permit was granted has been completed, or when the work permit is due to be terminated, or if the permit is cancelled after the start, the same person who signed portion C shall sign portion D of the T.1276 form, thereby acknowledging that he is aware that the electrical equipment is to be made "live". The Contractor shall advise all his workmen accordingly.

- 13.3 Blasting within 500m of a railway line will only be permitted during intervals between trains. A person appointed by the Technical Officer, assisted by flagmen with the necessary protective equipment, will be in communication with the controlling railway station. Only this person will be authorised to give the Contractor permission to blast, and the Contractor shall obey his instructions implicitly regarding the time during which blasting may take place.
- 13.4 The flagmen described in 13.3, where provided by Transnet, are for the protection of trains and Transnet property only, and their presence does not relieve the Contractor in any manner of his responsibilities in terms of Explosives Act or Regulations, or any obligation in terms of this Contract.
- 13.5 The person described in 13.3 will record in a book provided and retained by Transnet the dates and times -
- (i) when each request is made by him to the controlling station for permission to blast;
  - (ii) when blasting may take place;
  - (iii) when blasting actually takes place; and
  - (iv) when he advises the controlling station that the line is safe for the passage of trains.
- 13.6 Before each blast the Contractor shall record in the same book, the details of the blast to be carried out. The person appointed by the Technical Officer and the person who will do the blasting shall both sign the book whenever an entry described in 13.5 is made.

13.7 The terms of clause 27 hereof shall be strictly adhered to.

14. **RAIL TROLLEYS**

14.1 The use of rail trolleys or trestle trolleys on a railway line for working on high voltage equipment will be permitted only if approved by the Technical Officer and under the conditions stipulated by him.

15. **SIGNAL TRACK CIRCUITS**

15.1 Where signal track circuits are installed, the Contractor shall ensure that no material capable of conducting an electrical current makes contact between rails of a railway line/lines.

15.2 No signal connections on track-circuited tracks shall be severed without the Technical Officer's knowledge and consent.

16. **PENALTY FOR DELAYS TO TRAINS**

16.1 If any trains are delayed by the Contractor and the Technical Officer is satisfied that the delay was avoidable, a penalty will be imposed on the Contractor of R5 000 per hour or part thereof for the period of delay, irrespective of the number of trains delayed.

**PART B - ADDITIONAL SPECIFICATION FOR WORK NEAR HIGH-VOLTAGE ELECTRICAL EQUIPMENT**

**17. GENERAL**

- 17.1 This specification is based on the contents of Transnet's publication SAFETY INSTRUCTIONS, HIGH-VOLTAGE ELECTRICAL EQUIPMENT, as amended, a copy of which will be made available on loan to the Contractor for the duration of the contract. These instructions apply to all work near live high-voltage equipment maintained and/or operated by Transnet, and the onus rests on the Contractor to ensure that he obtains a copy.
- 17.2 The Contractor's attention is drawn in particular to the contents of Part I, Sections 1 and 2 of the Safety Instructions : High-Voltage Electrical Equipment.
- 17.3 The Safety Instructions : High-Voltage Electrical Equipment cover the minimum safety precautions which must be taken to ensure safe working on or near high-voltage electrical equipment, and must be observed at all times. Should additional safety measures be considered necessary because of peculiar local conditions, these may be ordered by and at the discretion of the Electrical Officer (Contracts).
- 17.4 This specification must be read in conjunction with and not in lieu of the Safety Instructions : High-Voltage Electrical Equipment.
- 17.5 The Contractor shall obtain the approval of the Electrical Officer (Contracts) before any work is done which causes or could cause any portion of a person's body or the tools he is using or any equipment he is handling, to come within 3 metres of any live high-voltage equipment.
- 17.6 The Contractor shall regard all high-voltage equipment as live unless a work permit is in force.
- 17.7 Safety precautions taken or barriers erected shall comply with the requirements of the Electrical Officer (Contracts), and shall be approved by him before the work to be protected is undertaken by the Contractor. The Contractor shall, unless otherwise agreed, bear the cost of the provision of the barriers and other safety precautions required, including the attendance of Transnet staff where this is necessary.
- 17.8 No barrier shall be removed unless authorised by the Electrical Officer (Contracts).

**18. WORK ON BUILDINGS OR FIXED STRUCTURES**

Before any work is carried out or measurements are taken on any part of a building, fixed structure or earthworks of any kind above ground level situated within 3 metres of live high-voltage equipment, the Electrical Officer (Contracts) shall be consulted to ascertain the conditions under which the work may be carried out.

- 18.2 No barrier erected to comply with the requirements of the Electrical Officer (Contracts) shall be used as temporary staging or shuttering for any part of the Works.
- 18.3 The shuttering for bridge piers, abutments, retaining walls or parapets adjacent to or over any

track may be permitted to serve as a barrier, provided that it extends at least 2,5 metres above any working level in the case of piers, abutments and retaining walls and 1,5 metres above any working level in the case of parapets.

19. **WORK DONE ON OR OUTSIDE OF ROLLING STOCK, INCLUDING LOADING OR UNLOADING**

19.1 No person shall stand, climb or work whilst on any platform, surface or foothold higher than the normal unrestricted places of access, namely -

- (i) the floor level of trucks;
- (ii) external walkways on diesel, steam and electric locomotives, steam heat vans, etc. and
- (iii) walkways between coaches and locomotives.

When in these positions, no person may raise his hands or any equipment or material he is handling above his head.

19.2 In cases where the Contractor operates his own rail mounted equipment, he shall arrange for the walkways on this plant to be inspected by the Electrical Officer (Contracts) and approved, before commencement of work.

19.3 The handling of long lengths of material such as metal pipes, reinforcing bars, etc should be avoided, but if essential they shall be handled as nearly as possible in a horizontal position below head height.

19.4 The Responsible Representative shall warn all persons under his control of the danger of being near live high-voltage equipment and shall ensure that the warning is fully understood.

19.5 Where the conditions in 19.1 to 19.3 cannot be observed the Electrical Officer (Contracts), shall be notified. He will arrange for suitable Safety measures to be taken. The Electrical Officer (Contracts), may in his discretion and in appropriate circumstances, arrange for a suitable employee of the Contractor to be specially trained by Transnet and at its costs, as an Authorised Person to work closer than 3 metres from live overhead conductors and under such conditions as may be imposed by the Senior responsible Electrical Engineer in Transnet.

20. **USE OF EQUIPMENT**

20.1 Measuring Tapes and Devices

20.1.1 Measuring tapes may be used near live high-voltage equipment provided that no part of any tape or a person's body comes within 3 metres of the live equipment.

20.1.2 In windy conditions the distance shall be increased to ensure that if the tape should fall it will not be blown nearer than 3 metres from the live high-voltage equipment.

- 20.1.3 Special measuring devices longer than 2 metres such as survey staves and rods may be used if these are of non-conducting material and approved by the responsible Electrical Engineer in Transnet, but these devices must not be used within 3 metres of live high-voltage equipment in rainy or wet conditions.
- 20.1.4 The assistance of the Electrical Officer (Contracts) shall be requested when measurements within the limits defined in 20.1.1 to 20.1.3 are required.
- 20.1.5 The restrictions described in 20.1.1 to 20.1.3 do not apply on a bridge deck between permanent parapets nor in other situations where a barrier effectively prevents contact with the live high-voltage equipment.

## 20.2 Portable Ladders

- 20.2.1 Any type of portable ladder longer than 2 metres may only be used near live high-voltage equipment under the direct supervision of the Responsible Representative. He shall ensure that the ladder is always used in such a manner that the distance from the base of the ladder to any live high-voltage equipment is greater than the fully extended length of the ladder plus 3 metres. Where these conditions cannot be observed, the Electrical Officer (Contracts) shall be advised, and he will arrange for suitable safety measures to be taken.

## 21. CARRYING AND HANDLING MATERIAL AND EQUIPMENT

- 21.1 Pipes, scaffolding, iron sheets, reinforcing bars and other material, which exceeds 2 metres in length, shall be carried completely below head height near live high-voltage equipment. For maximum safety two or more persons so as to maintain it as nearly as possible in a horizontal position should carry such material. The utmost care must be taken to ensure that no part of the material comes within 3 metres of any live high-voltage equipment.
- 21.2 Long lengths of wire or cable shall never be run out in conditions where a part of a wire or cable can come within 3 metres of any live high-voltage equipment unless the Electrical Officer (Contracts) has been advised and has approved appropriate safety precautions.
- 21.3 The presence of overhead power lines shall always be taken account of especially when communication lines or cables or aerial cables, stay wires, etc. are being erected above ground level.

## 22. PRECAUTIONS TO BE TAKEN WHEN ERECTING OR REMOVING POLES, ANTENNAE, TREES ETC.

- 22.1 A pole may be handled for the purpose of erection or removal near high-voltage equipment under the following conditions:
- (i) If the distance between the point at which the pole is to be erected or removed and the nearest live high-voltage equipment is more than the length of the pole plus 3 metres, the work shall be supervised by the Responsible Representative.

- (ii) If the distance described in (i) is less than the length of the pole plus 3 metres, the Electrical Officer (Contracts) shall be consulted to arrange for an Authorised Person to supervise the work and to ensure that the pole is earthed where possible. The pole shall be kept in contact with the point of erection, and adequate precautions shall be taken to prevent contact with live high-voltage equipment.

22.2 The cost of supervision by an Authorised Person and the provision of earthing shall, unless otherwise agreed, be borne by the Contractor.

22.3 The provisions of clauses 22.1 and 22.2 shall also apply to the erection or removal of columns, antennae, trees, posts, etc.

23. **USE OF WATER**

23.1 No water shall be used in the form of a jet if it can make contact with any live high-voltage equipment or with any person working on such equipment.

24. **USE OF CONSTRUCTION PLANT**

24.1 "Construction plant" entails all types of plant including cranes, piling frames, boring machines, excavators, draglines, dewatering equipment and road vehicles with or without lifting equipment.

24.2 When work is being undertaken in such a position that it is possible for construction plant or its load to come within 3 metres of live high-voltage equipment, the Electrical Officer (Contracts) shall be consulted. He will arrange for an Authorised Person to supervise the work and to ensure that the plant is adequately earthed. The Electrical Officer (Contracts) will decide whether further safety measures are necessary.

24.3 The cost of any supervision by an Authorised Person and the provision of earthing shall, unless otherwise agreed, be borne by the Contractor.

24.4 When loads are handled by cranes, non-metallic rope hand lines shall be used, affixed to such loads so as to prevent their swinging and coming within 3 metres of live high-voltage equipment.

24.5 Clauses 24.1 to 24.4 shall apply mutatis mutandis to the use of maintenance machines of any nature.

25. **WORK PERFORMED UNDER DEAD CONDITIONS UNDER COVER OF A WORK PERMIT**

25.1 If the Responsible Representative finds that the work cannot be done in safety with the high-voltage electrical equipment live, he shall consult the Electrical Officer (Contracts) who will decide on the action to be taken.

25.2 If a work permit is issued the Responsible Representative shall -

- (i) before commencement of work ensure that the limits within which work may be carried out

have been explained to him by the Authorised Person who issued the permit to him, and that he fully understands these limits.

- (ii) sign portion C of the permit before commencement of work;
- (iii) explain to all persons under his control the limits within which work may be carried out, and ensure that they fully understand these limits;
- (iv) care for the safety of all persons under his control whilst work is in progress; and
- (v) withdraw all personnel under his control from the equipment on completion of the work before he signs portion D of the work permit.

26. **TRACTION RETURN CIRCUITS IN RAILS**

26.1 DANGEROUS CONDITIONS CAN BE CREATED BY REMOVING OR SEVERING ANY BOND.

26.2 Broken rails with an air gap between the ends, and joints, at which fishplates are removed under "broken bond" conditions, are potentially lethal. The rails on either side of an air gap between rail ends on electrified lines shall not be touched simultaneously until rendered safe by Transnet personnel.

26.3 The Contractor shall not break any permanent bonds between rails or between rails and any structure. He shall give the Technical Officer at least 7 days written notice when removal of such bonds is necessary.

26.4 No work on the track which involves interference with the traction return rail circuit either by cutting or removing the rails, or by removal of bonds shall be done unless the Electrical Officer (Contracts) is consulted. He will take such precautions as may be necessary to ensure continuity of the return circuit before permitting the work to be commenced.

27. **BLASTING**

27.1 The Contractor shall obtain the permission of the Electrical Officer (Contracts) before blasting, and shall give at least 14 days notice of his intention to blast.

27.2 No blasting shall be done in the vicinity of electrified lines unless a member of Transnet's electrical personnel is present.
